🎓 Education

2018 – 2022
Puerto Ordaz,
Venezuela

Computer Science & Engineering,

Universidad Nororiental Privada "Gran Mariscal de Ayacucho"

- I pursued my passion for web development through various advanced courses.
- For my thesis, I developed a virtual classroom that allows students to do their homework, review their notes, register for courses, among other things. Teachers are also able to grade their student's works and create new activities. This is a React web application using Express in the server-side code with MongoDB as the database

📁 Projects

2021/05 – 2021/07

Virtual Classroom

This is an online classroom with different types of users, these are students, teachers, and an admin. The users are able to see all the available courses, activities, and files. It was built using ReactJS and NodeJS.

2022/02

The Wardrobe, E-Commerce

This is a simple e-commerce that allows its users to see all the current products by category, search for any existing product, add the products to their cart, and make a purchase using a credit card. It was built using ReactJS and Django REST Framework.
