Computer Science & Engineering, *Universidad Nororiental Privada "Gran Mariscal de Ayacucho"*

- I pursued my passion for web development through various advanced classes.
- For my thesis, I developed a virtual classroom that allows students to do their homework, review their notes, register for courses, among other things. Teachers are also able to grade their student's works and create new activities. This is a React web application using Express in the server-side code with MongoDB as the database
